PROFESSIONAL SUMMARY

Computer Engineering undergraduate with a strong foundation in Python, Machine Learning, and AI, experienced in building end-to-end intelligent applications from data preprocessing and model development to API integration and deployment. Passionate about developing scalable, real-world machine learning solutions with interests in predictive analytics, computer vision, and production-ready AI systems.

EDUCATION

AISSMS College of Engineering, Pune
Bachelor of Engineering in Computer Engineering

2023 – 2027
CGPA: 8.54 / 10

TECHNICAL SKILLS

Languages: Python, C++, SQL

Machine Learning: Scikit-learn, Pandas, NumPy, Feature Engineering, Data Preprocessing, Regression, Classification, Model Evaluation

Artificial Intelligence: Computer Vision, LangChain, RAG, Prompt Engineering

Backend Development: Flask, FastAPI, Django, REST APIs

Databases: PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, Docker, AWS EC2, GitHub, VS Code

TRAINING

Python Development Intern
aXcentra

One Month

- Developed Python applications while strengthening object-oriented programming and problem-solving skills.
- Worked with file handling, modules, exception handling, and real-world programming tasks during the internship.
- Collaborated on practical assignments following clean coding practices and version control workflows.

PROJECTS

Predictive Equipment Maintenance Platform | *Python, FastAPI, Scikit-learn, PostgreSQL, Docker*

- Designed an end-to-end predictive maintenance platform to estimate equipment failure probability using machine learning models trained on historical sensor and maintenance data.
- Built a complete ML pipeline including data preprocessing, feature engineering, model training, evaluation, and inference for predictive analytics.
- Developed RESTful APIs using FastAPI for equipment management, telemetry ingestion, maintenance records, and real-time prediction services.
- Integrated PostgreSQL for structured storage of equipment, telemetry, and maintenance history while containerizing the application using Docker for consistent deployment.

AI Document Assistant (RAG Chatbot) | *Python, LangChain, FAISS, OpenAI API, Streamlit*

- Developed a Retrieval-Augmented Generation (RAG) application capable of answering document-specific queries using semantic search.
- Implemented document chunking, vector embeddings, and FAISS indexing to retrieve contextually relevant information efficiently.
- Integrated LLM-based response generation with prompt engineering to improve answer relevance and reduce hallucinations.

Food Delivery Time Prediction | *Python, Scikit-learn, Flask, Pandas*

- Built a machine learning regression model to estimate food delivery time using location, traffic, weather, and order-related features.
- Performed data preprocessing, feature engineering, model training, and evaluation using Scikit-learn to improve prediction performance.
- Deployed the trained model as a Flask web application with OpenCage API integration for real-time location processing.

LEADERSHIP & RESPONSIBILITIES

Sponsorship & Public Relations Head

2025

ET2025, AISSMS College of Engineering

- Led sponsorship outreach and industry communication while coordinating with internal teams for successful event execution.
- Managed professional communication with sponsors and contributed to partnership development.

Photography Head

2025 – Present

Sports Media Club

- Led a team responsible for photography and media coverage of multi-sports tournaments and events.
- Coordinated event planning and content management under strict timelines.

Programming Department Member

2025 – Present

CIPHERS Technical Club

- Contributed to technical events, programming activities, and collaborative development initiatives within the club.

ACHIEVEMENTS

- Built multiple end-to-end Machine Learning and AI applications involving model development, deployment, and REST API integration.
- Developed production-oriented backend services using Flask and FastAPI for intelligent applications.

CERTIFICATIONS

- AWS re/Start Program
- Python Basics – HackerRank
- Advanced Python Concepts – CodeWithHarry Python Bootcamp
- aXcentra Internship – Python Development
